About

Green Watch is a socio-ecological knowledge processor, a sister concern of Rejautsu Serves. Rejautsu Serves is a national level non-governmental organisation with an objective to add value based practices for the development of society and environment and focus on to maintain and nurture the sustainable performance of an organisation with a responsible disclosure of environment and social impacts. It endeavours to integrate sustainable practices for inclusive growth and betterment of Society and Environment. In the process, it is working towards developing robust models for sustainable performance management.

Green Watch is a knowledge based initiative with an inclusive approach for sustainable development practices all around. With an objective to keep the stakeholders (Businesses, Governments, Communities) informed with latest of the information and happenings in the process of maintaining ecological balance around, a global fortnightly update (called Sustainability Update), keeps a track on policies, activities and practices worldwide for the betterment of society and environment. In the process of making this initiative, a platform to share, inform and learn about the various initiatives, roles, studies, news etc., we also would like to hear from you.

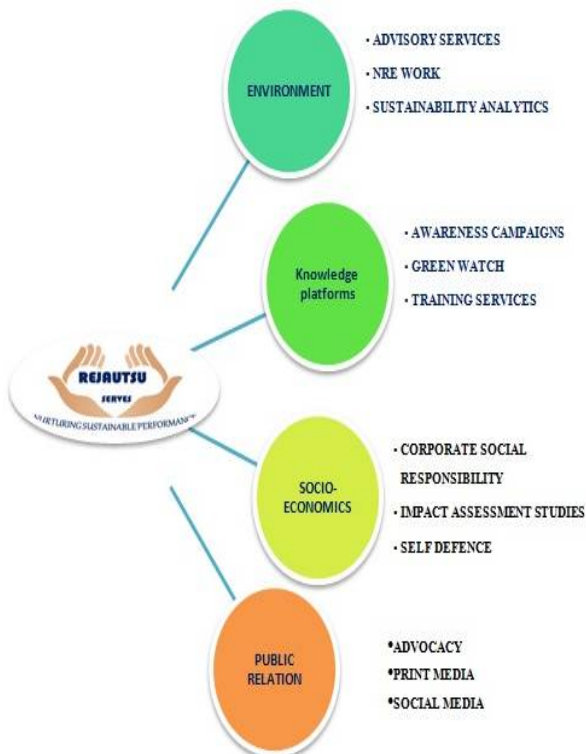

If you would like to contribute and share any article/ research paper/ case studies/ Stories etc. with the worldwide green community on the broader scope of the Newsletter, you are welcome to share the same with us at editor.greenwatch@gmail.com.

For more information, please visit <https://greenwatchcommunity.wordpress.com/>

Initiatives

“Rejautsu Serves” celebrates World Environment Day, June 05, 2016

Rejautsu Serves celebrated “World environment Day” on June 05, 2016 at Dehradun and organised a sensitisation programme on environment awareness among children and parents. The theme of the event was taken in line of United Nation Environment Programme (UNEP) i.e. “Join the race to make the world a

Rejautsu Serves (Scope of Work)

Sustainability Update

(A global update on environment, policies and activities worldwide for sustainable development.)

Sept' 2016

Number 1/2016

better place" for the year 2016. The event has been co-organised by Hill Foundation. As the increasing world population and decrease in per capita availability of natural resources has resulted in growing toxic waste and pollution of the natural resources i.e. Air, Water and Soil, sustainable livelihood practices in a day to day live and preservation of environment has become very important. As per the Millennium Ecosystem Assessment Study 2005, it has been observed that there has been more than 62% decline in the availability of natural resources in the last 4 decades. Sustainable management of resources has become one of the most important aspects for sustainable development to conserve the same for our next generation. The awareness on the environment, its degradation and benefits of conservation is of significant importance. The communities need to be sensitized and encouraged for the environmental conservation and optimum utilization of the available resources to achieve the sustainable development goals as per the Millennium development Goals (MDGs) by United Nations Development Programme (UNDP).

In order to promote the "green way of life" amongst all the stakeholders' viz. students, teachers, policy makers etc. to enhance their commitment towards preservation of environment and sustainable management ecology and environment for achieving the targets as sent by United Nation Development Programme (UNDP) for sustainable

development. Shri Harbans Kapoor, Former Speaker of Uttarakhand Legislative Assembly was the Chief Guest of this sensitisation programme, which was participated by various luminaries from the governments including education department, more than 150 children and parents. On this occasion, chief guest planted saplings and participated in the awareness programmes as organized. In his address, He emphasized on the conservation of forest, talked about the climate change and benefits of safeguarding the environment.

The broad aims/ objective of the programme was to

- ✚ Sensitize about the environment, its protection and benefits
- ✚ Promote sustainable practices at micro level
- ✚ Enhance awareness about the climate change and its ill impacts
- ✚ Encourage children to go green from the childhood
- ✚ Promote sports and various other extracurricular activities

The event started with Shri Ganesh Vandana, followed by addresses by the organizers and address by hon'ble Chief Guest and various activities. The schedule of the event can be exhibited as under:

Inaugural Session

- ✚ Shri Ganesh Vandana
- ✚ Address by the Organisers i.e. Chairman, Rejautsu Serves and Chairman, Hill Foundation

selected from various categories for the State Taekwondo championship.

1st Governing Body Meeting of Rejautsu Serves

The 1st Governing Body Meeting for Rejautsu Serves took place in New Delhi, India on Aug 16, 2016. Hon'ble President chaired the session which was participated by the Vice President, Secretary, Treasurer, executive members, advisors and other stakeholders from various states and industries.

While welcoming the session, President thanked the Governing Body Members for their cooperation and contribution for this noble initiative. The detailed discussion on several aspects as per the objectives of the Society has been undertaken by the Governing Body. The Governing Body also discussed on programmes and activities of the Organisation during the session. Other important matters that were discussed during the meeting include:

- ✚ Proposal on Workshop-cum-Conference on "Physical education and Sport for Women: Fostering a prosperous and contributing society"
- ✚ District/ State level Taekwondo Championship
- ✚ Workshop cum Conference series on the "Sensitisation programme on Environment Awareness"
- ✚ Raising the profile of "Rejautsu Serves" and reach across the globe in all continents by working on issues of global importance

- ✚ Nurture a sustainable platform for performance of business, Society and Environment for a win-win approach
- ✚ Work in association with various governmental, non governmental agencies for a better and sustainable society and inclusive development
- ✚ Work in line with the Millennium Development Goals for sustainable Development as derived by United Nations (UN) and research on the environment and society for inclusive growth.

National Update

Re-Categorisation of Industries

In the process of promote the ease of doing business, Ministry of Environment, Forest and Climate Change (MOEFCC); Government of India has released a new categorization policy for industries based on their pollution load. A new category of White Industries will not require environment clearance (EC) and consent. As per the ministry, 25 industrial sectors which were not critically polluting were earlier categorized as Red. The criteria of categorization of the industrial sectors are based on the pollution index which is a number from 0 to 100. The pollution index actually denotes the increasing degree of pollution load from the sector.

Easy access to environment information, website launched

Sustainability Update

(A global update on environment, policies and activities worldwide for sustainable development.)

Sept' 2016

Number 1/2016

Government has decided to disseminate the environmental information. A website and mobile application has been launched to integrate its existing 69 environment information system centre across the country. The Environment Information System ([ENVIS](#)) is an environment ministry initiative for integrating country-wide efforts in environment-related information collection, collation, storage and dissemination. The ENVIS portal will run parallel with Digital India Objective and aid the efforts for improving digital literacy in the environment sector. It should be made a "people-centric movement," environment minister Shri Prakash Javadekar said while launching the website and mobile app.

(Times of India , Feb 18, 2016)

Fast depleting Green Cover

[Ministry of Environment, Forest and Climate Change \(MoEFCC\)](#) has diverted 34,620 hectares of forest land, granting them final clearances (Stage II). The forest land diversion has been taken into consideration for 1513 projects under 22 projects categories. The mining sector i.e. coal mining, bauxite mining and other minor mineral projects granted around a third of this diverted forest land. Other sectors include road sector, irrigation sector and transmission lines projects, which got a large extent of forest land.

(DNAIndia, May 11, 2016)

Increasing Ease of Doing Business, Government relaxing Green Norms

Government has relaxed some of the green norms to enhance ease of doing business and spurring the housing for all programme as per the pledge of the National Democratic Alliance (NDA) government by 2022. The move will surely have a positive impact on the construction industry. The sustainable management of resources and fulfilling environmental guidelines is also of immense significance. India is going to witness rapid urbanisation upto 2030

Green Tax to address forestry woes: Draft National Forest Policy

The environment ministry has released the draft of India's new National Forest Policy (NFP), proposing the levy of a green tax for facilitating ecologically responsible behaviour, supplementing financial resources essential to address forestry woes. NFP is an overarching policy for forest management to bring a minimum one-third of India's total geographical area under forest or tree

Sustainability Update

(A global update on environment, policies and activities worldwide for sustainable development.)

Sept' 2016

Number 1/2016

cover. The proposed NFP follows the last edition in 1988. "Forests and trees constitute nearly one fourth of the geographic area of the country. Protection of this vast and valuable resource, improving and increasing the forest and tree cover requires adequate investment keeping in view the pressures on these forests, and the ecosystem services that they provide to the nation. Large tracts of forest area in the country have degraded due to immense biotic pressure and lack of adequate investment," says the draft policy.

(Livemint, Sep 05, 2016)

Industries extracting groundwater in Ghaziabad

National Green Tribunal is informed about the extraction of ground water by a large no. of industries in Ghaziabad, Uttar Pradesh (U.P.) through the borewells installed in their premises. This led to the depletion of water table in the area. An inspection report in this regard has also been taken out by a team of officers of the district administration. Industries include tanneries, breweries, textile units and others operating in the area. A bench in this regard has directed Uttar Pradesh State Industrial Development Corporation limited (UPSIDC), State Pollution Control Board (UPPCB) and the District Magistrates (DMs) of Ghaziabad and Hapur to respond the issue of indiscriminate extraction of groundwater and diminution of water table. The plea had been submitted by a Ghaziabad resident Mr. Sushil Raghav and NGO Society for Protection Of Environment

and Biodiversity (SPENBIO) for closure of the industrial units involved illegally in groundwater extraction in the notified area of Ghaziabad and Hapur. The plea also alleged about the corruption in Ghaziabad Nagar Nigam for illegally selling groundwater to industries. The tribunal has ordered Ghaziabad DM to appoint a team of officers to inspect 233 industries violating the norms. The notices have earlier been also issued to the MoEFCC, Central Ground Water Authority (CGWA), U.P. Government and SPCB in this case.

(NDTV, Sep 01, 2016)

India's ambitious renewable energy goals

India is world's third largest as far as carbon emission is concerned. The same is growing in a much faster rate in comparison to the first and second largest emitters viz. U.S. and China. "Total installed solar capacity has grown by 80 % in past 1 year and reached 8.1 gigawatts (GW)", The Economic Times. The Indian Prime Minister hopes to achieve a 100 GW installation capacity by 2022 which is more than double of the capacity of China and Germany, two biggest solar nations. This would be five folded increase from the target set by previous government i.e. 20 GW. Various ways to improve the infrastructure in the economy is to be taken care.

Call for integrated approach for urban development

Sustainability Update

(A global update on environment, policies and activities worldwide for sustainable development.)

Sept' 2016

Number 1/2016

Expressing concerns over the unplanned development in member countries, BRICS nations (Brazil, Russia, India, China and South Africa) have called for an integrated approach towards urban development and management. Through involvement of society, governments and other stakeholders at a larger level, the challenges and consequences of unplanned urban development can be tackled.

(Hindustan Times, Sept 14, 2016)

India needs a Wikipedia like website on environment

The data on Indian natural environment is not available properly. Government agencies have failed in maintaining environmental data. Most of the data pertaining to the environment is collected by state machinery. Few agencies such as Indian Meteorological department (IMD) and Indian Space Research organization (ISRO) record data on temperature, rainfall and satellite based land cover data responsibly. Other than these two outstanding agencies, other agencies have a no. of shortcomings as far as data on environment is concerned viz. Failure in maintaining records, Unreliable and Falsified information, Failure in making information publically available, Failure in getting public participation on generating information. A central repository on the environmental data is of immense significance which can provide real time information.

(Scroll, Sept 13, 2016)

Introduction of Environment Education in School Curriculum

Supreme Court of India has directed Ministry of Human Resource Development (MHRD) to constitute a committee to monitor and ensure all the state education boards for introduction of Environment Education a compulsory subject in School Curriculum across the country. The court was hearing a PIL filed by environmentalist Mr. M.C. Mehta in 1991 asking for compulsory Environmental Education in Schools and Colleges. MHRD will bring all the stakeholders on a common platform to share views and difficulties in implementing the same. "The Supreme Court will proceed against the states not complying with the orders," said a bench of Chief Justice of India Shri T. S. Thakur.

Indian Express, Sept 16, 2016

Environment Ministry announces collaborative R&D programme to develop sustainable refrigerant technology

Ministry of Environment, Forest and Climate Change (MoEFCC), Government of India has announced a collaborative research and development (R&D) programme for developing sustainable refrigerant technologies as alternatives to the climate damaging hydro fluorocarbons (HFCs). The cutting down of HFCs is considered to be quite important as it has an adverse impact on climate.

Central and UP Government noticed for encroachment of Arthala Lake

NGT issued notice to centre and UP government for encroachment on Arthala Lake. The lake is located near Hindon River in Ghaziabad. High scale of dumping of toxic waste and industrial effluents leads to ground water contamination. The tribunal has asked response from the governments and local development authority over the same. Illegal construction, unauthorised occupation on the lake has degraded the environment. The degradation of public health due to environmental degradation is of great concern. The size of the lake has shrunken to almost half due to all these.

(Times of India, Sept 15, 2016)

Increasing Air pollution causing a life in every 23 seconds in India

Increasing Air pollution in India has been at terrifying level. Reports on Air Pollution by World Health Organisation (WHO) states about the pre mature death every year due to it i.e. almost one death in every 23 seconds. The increasing pollution will affect the liveability by 2030 and oxygen kit will become a part of our lifestyle in near future.

(Times of India, Sept 18, 2016)

Concerns raised over degradation of Himalayas

The degradation of Himalayan environment has been in focus at a BRICS environment ministers' meeting in Goa. Anil Dave, Hon'ble Minister of state for

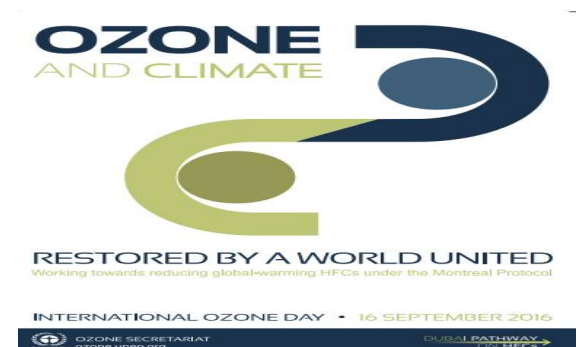

Environment, Forest and Climate Change, Government of India raised the concerns over degradation of Himalayas. He said that the same is the effect of global climate change and India and China are working out ways to address the issue. The issue of rapid melting of the glaciers is of immense concern. The Environment Ministers of BRICS countries have agreed on Memorandum of Understanding (MOU) on setting up joint working group to tackle up diverse environment related issues.

National Workshop Series on Sensitisation Programme on e-Waste Management and Safe Handling

Sustainability Update

(A global update on environment, policies and activities worldwide for sustainable development.)

Sept' 2016

Number 1/2016

Rejautsu Serves in collaboration with eGAP Consulting India is to organise a national workshop on Sensitisation programme on E-Waste Management and Safe Handling at Noida, India on Nov 5, 2016. The main objective of the event is to disseminate better understanding about E Waste Management & Safe Handling Law governed by MoEFCC, promote Entrepreneurship opportunity, toxic free environment, interpret and evaluate environment and social impacts, extended producer responsibility of the Manufacturers/suppliers/ Consumers, trans boundary movements of E Wastes etc. This programme will create awareness about the management of E Waste Management & Handling as per the guidelines of Ministry of Environment Forest & Climate Change (MOEF&CC), Govt. of India. This will be fruitful to the policy makers, planning and management professionals working in environment and development sectors, E Waste Recyclers/ Dismantlers/ Collection Centers, Industrial Professionals academicians, NGO professionals, Journalists, researchers and students. A rich blend of interactive class-room sessions, sharing of experiences, film shows/videos, case studies, hands on exercises, simulation games, lectures and presentations by experts/activists from the field for developing core competence shall be the mainstay of this programme. The multi disciplined experts at eGAP and Rejautsu Serves will use their rich industrial and public

policy experience to orient the professionals considering the social and environmental reality and the field challenges.

About the Organizations:

eGreens AP Consulting India LLP aims to partner with people and social organizations in creating financially viable and sustainable solutions to various social, economical and environmental issues/challenges. The social investing approach at eGAP focuses on achieving best possible outcomes by working closely in partnership with social enterprises/people and foundations in a collaborative way.

Rejautsu Serves is a national level non-governmental organisation with an objective to add value based practices for the development of society and environment and focus on to maintain and nurture the sustainable performance of an organisation with a responsible disclosure of environment and social impacts. It endeavors to integrate sustainable practices for inclusive growth and betterment of Society and Environment. In the process, it is working towards developing robust models for sustainable performance management.
